## DETAILED ACTION

### *Acknowledgement*

Acknowledgment is made that applicant's Amendment, filed on 9 July 2001, has been entered and claim 5 has been canceled.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art **Fig. 1** in view of D'errico (5,631,315) and/or Ando et al. (5,514,485). Applicant's admitted prior art **Fig. 1** teaches all the limitations stated in the preamble. Applicant's admitted prior art **Fig. 1** fails to teach a tin oxide layer adhered to the metal capping layer. D'errico, **see col. 5, line 65 – col. 7, line 40** and Ando et al. **see abstract and col. 1, line 62 – col. 2, line 16**, teaches tin oxide, as a dielectric layer(s), and its adhesive properties were well known in the art at the time the invention was made. It has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

In regard to claims 2-4 and 6, Ando et al. teaches all the stated limitations, **see col. 16, lines 44-63**.

In regards to claim 7, Applicant's admitted prior art teaches all stated limitations, **see Fig. 1.**

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Satoh et al. (4990972) disclose a semiconductor light emitting device with a DBR layer containing alternating layers of tin oxide, **see col. 11, lines 5-11.**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
